

**Energy Management Services.
Renewable Energy Solutions.
Comprehensive Environmental Consultation.**

With nearly 90 years of experience, EMCOR Services Combustioneer (Combustioneer) is one of the Washington, D.C., Metropolitan Area's leading full-service, single-source mechanical, electrical, and building automation and controls firms. Using today's most advanced technology, Combustioneer helps clients optimize operational efficiency and productivity by integrating a variety of systems—including air conditioning, heating, lighting, power generation, and more. Combustioneer works to help clients achieve high-performance operation, reduced energy consumption, and maximum cost savings.

As a full-service mechanical, plumbing, and energy services company, Combustioneer is uniquely positioned to address the environmental impact of nearly every aspect of a client's facilities and operations. As energy management consultants, Combustioneer offers a wide range of services and tools that contribute to the environmental sustainability of a client's existing facility, including renewable energy consulting. With Combustioneer, clients receive cutting-edge, comprehensive environmental consultation that helps cut down on energy costs and saves clients' money.

**From Low-Cost to No-Cost
—Combustioneer Has Clients Covered.**

Properly managed strategic energy consumption gives businesses a competitive edge in the market by reducing operating expenses. At the same time, optimizing consumption can help reduce a facility's overall environmental impact and increase sustainability.

The highly-trained and certified building automation experts at Combustioneer help clients identify ways to reduce energy use without negatively affecting productivity, and many of these solutions are low-cost or no-cost approaches. Combustioneer can also assist clients in obtaining and maintaining LEED and Energy Star certifications that help demonstrate a commitment to sustainability.

**Sustainable Solutions.
That Make a Real Difference.**

Combustioneer positively impacts sustainability efforts for hundreds of facilities each year by providing a variety of energy-consulting services and innovative construction solutions. Combustioneer's environmental and sustainable energy offerings include:

- » Lighting and plumbing retrofits
- » LEED certification
- » Chiller, boiler, and VSD upgrades and retrofits
- » Building control system upgrades and site solutions that minimize energy consumption and improve tenant comfort
- » Recommendations for cogeneration power, solar power, and fuel cell facilities
- » Vegetative roof support systems
- » Energy consulting and design services
- » Utility usage review, data logging, monitoring, and, if needed, maintenance and repair

Combustioneer provides a range of services for virtually every component of a facility's mechanical, electrical, and automation systems. Services include:

Critical Power Services

- » Emergency power
- » Generator service
- » Preventive maintenance

Mechanical Services

- » Building automation systems
- » Customized maintenance programs
- » Fabrication
- » HVAC
- » Industrial and process piping
- » Plumbing

**Engineering, Construction,
& Energy Services**

- » Design-build
- » Energy management and saving services
- » Engineering and construction

**Unparalleled Performance.
In Nine Major Markets.**

- » Biotech/Healthcare
- » Commercial
- » Education
- » Entertainment/Hospitality
- » Financial Services
- » Manufacturing/Industrial
- » Mission Critical Operations
- » Public/Government
- » Technology

**We Make Buildings
Run Better.**
